ABOUT ME

Computer Science undergraduate specializing in Full-Stack Development and scalable digital platforms. Experienced in architecting secure web applications, developing API integrations, and deploying machine learning models. Proven ability to manage the full software development lifecycle from initial database design to production deployment for commercial clients.

EDUCATION

BSc (Hons) Computer Science 2025 - Present
Informatics Institute of Technology affiliated with University of Westminster, UK

G.C.E Advanced Level - Commerce Stream 2023 (2024)
Private Candidate

Diploma in Information Technology - Pearson Mar - Oct 2021
ESOFT Metro Campus

EXPERIENCE

- **Freelance Full-Stack Developer | MHM Taxi | May 2026 – Present**

- Architected and deployed the complete digital booking platform for mhmtaxi.com, managing the full software lifecycle. Engineered a custom pricing engine using the Google Maps API to calculate real-time fares, and designed business logic to optimize driver-to-passenger matching. Streamlined operations by routing structured booking payloads directly into a WhatsApp dispatch system, while utilizing a secure Supabase backend to manage customer reviews and user data across Vercel and Cloudflare.
- **Tech Stack:** Next.js, React, Tailwind CSS, Supabase, Cloudflare, Google Maps API

- **Freelance Full-Stack Developer | Rosary Global | April 2026 – Present**

- Spearheaded the end-to-end development of a serverless, high-converting digital travel platform, collaborating directly with stakeholders to translate business requirements into scalable technical solutions. Developed a dynamic checkout funnel supporting a multi-tier vehicle fleet with real-time API-driven pricing, and fortified the application's infrastructure by implementing strict secure coding guidelines, including bot-preventative honeypots and hardened HTTP headers.
- **Tech Stack:** Next.js, React, Tailwind CSS, Cloudflare, Web Security, Google Maps API

PROJECTS

- **Smart Event Planner | AI/ML Developer**
 - Collaborated within a cross-functional six-member team to build a smart event management platform, specifically developing the core AI recommendation engine using Random Forest models and improving its accuracy by 2% through strategic feature engineering and hyperparameter tuning.
 - **Tech Stack:** Python, Scikit-Learn, Pandas, FastAPI, Machine Learning (Random Forest)
- **Multi-User Blog Platform | Full Stack Developer**
 - Created a responsive web platform that allows multiple authenticated users to log in and post content, supported by a custom-designed, normalized MySQL relational database to safely store content and handle role-based access controls.
 - **Tech Stack:** PHP, MySQL, HTML/CSS, Bootstrap, Apache

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals
- LinkedIn Learning (Python)

SKILLS

- **Languages:** JavaScript/TypeScript, Java, Python, Kotlin, PHP, SQL
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML5, CSS3
- **Backend & Systems:** Node.js, Supabase, MySQL, Vercel, Cloudflare, RESTful APIs
- **Practices & Tools:** Web Security, API Integration, Git, GitHub, Agile
- **Soft Skills:** Team Collaboration, Communication, Problem-Solving
